

FREE Lean Manufacturing Assessment

Dear Friends and Collogues,

2009 has been a challenging year for many of us. The need to drive lean and continuous improvement throughout our entire business systems has never been so important for our survival.

Lean Engineering is offering a **FREE** Lean Manufacturing Assessment.

A Lean Manufacturing Assessment is the first step to understanding where your organization currently stands and what is needed to take the organization to a higher level of lean excellence.

A LEAN Engineering Facilitator will spend a day on-site with your organization interviewing key personnel, gathering data, and observing operations. Then, we will conduct an analysis that will yield the following:

- Lean Assessment Scores in a range of key areas
- General recommendations for layout, manufacturing, and supply chain strategy
- Specific recommendations for no cost, quick win opportunities
- A customized approach to a lean implementation plan
- Potential financial saving

If you are interested in learning more about our FREE Lean Manufacturing Assessment please contact Robert Lukaszonas at LEAN Engineering 585-507-9380 or email at BobL@rochester.rr.com

Happy New Year,
Robert Lukaszonas
President
LEAN Engineering
